ABSTRACTED-PUB-NO: DE 3904311 A

BASIC-ABSTRACT:

Microcapsules filled with volatile substances are applied to a substrate by (a) **coating** the offset- or screen-printed substrate with a quick-drying dispersion lacquer, (b) applying a mixt. of the microcapsules and a binder onto the lacquerr layer by printing, spraying or dipping, (c) drying the prod., and (d) cutting or stamping the prod. to obtain the desired format.

Pref. the substrate comprises a polymer **film** or non-absorbent paper or board.
The lacquer is a water-dilutable clear lacquerr that forms abrasion-resistant **coatings**. The capsules may contain perfumes, plant extracts, essential **oils or** **volatile** animal prods., **encapsulated** in a polymer **film**.
The capsule size is 10-100 (30-60) microns.

USE - The process may be used in the mfr. of cosmetic or pharmaceutical prods., promotional articles or samples, e.g. of perfumes. @ (3pp Dwg.No.0/0)
